DESCRIPTION

The TS921 is a RAIL TO RAIL single BiCMOS operational amplifier optimized and fully specified for 3V and 5V operation.

High output current allows low load impedances to be driven.

The TS921 exhibits a very low noise, low distortion, low offset and high output current capability making this device an excellent choice for high quality, low voltage or battery operated audio systems.

The device is stable for capacitive loads up to 500pF.

APPLICATIONS

- headphone amplifier
- piezoelectric speaker driver
- sound cards, multimedia systems
- line driver, actuator driver
- servo amplifier
- mobile phone and portable communication sets
- instrumentation with low noise as a key factor
